Captain and Mrs. Lyre Garrett announce the birth of a baby boy, Robert Monroe, February 15.

Important rationing dates of February are listed below:

COPPER—February 8. Coupon Number 25 became valid February 8. It will be good for one pound of copper through March 31.

SUGAR—February 1. Coupon Number 11 in War Ration Book One is good for three pounds of sugar and is valid through March 15.

FOOD—March 1. Actual rationing of food commodities will begin on this date, and registration of the entire rationed population for War Ration Book 22, 23, 24, 25, 26. The first ration period will cover the month of March and each holder of War Ration Book 22 will have 48 points to spend.

MILEAGE—GASOLINE—TIRES—March 31. All holders of coupon books will now have until this date for their initial tire inspection by this date. Thereafter, tires inspected every 6 months instead of every 4 months as previously designated.

February 23. Motorists with 'B' ration books must have their tires inspected by this date. After that, inspections for 'B' holders will be held every 6 months, and for 'C' and bulk coupon holders once every three months.

March 22. Number 5 coupon in basic 'A' ration books becomes valid on this date.

February 28. All holders of 'T' coupon books must have their tires inspected by this date. Thereafter, every 60 days or every 5,000 miles, whichever occurs first.

FUEL. Old. Period Four, indefinite value coupons, valid during February, March and early April, have been decreased 10 per cent and are now worth nine gallons per unit. They will expire April 6.

SHOES. Stamp No. 17 of War Ration Book One will be needed to purchase a pair of shoes between February 8 through June 15.

As with sugar and coffee, the stamp must be torn out of the book at the time of purchase in the presence of the person selling the shoes or making delivery. A person buys shoes by mail the stamp may be detached and sent with the mail order.

Eliminate Hazards!

Unless soldiers on the farm front are careful, an army of nearly 4,500 farm workers will be killed this year by mechanical equipment and livestock.

"That's why we say that heroism isn't confined to the front battle lines in this war," farm families were told by E. W. Lehmann, head of the agricultural engineering department, University of Illinois college of agriculture.

The shortage of labor, inexperienced machine operators and use of older machinery will aggravate the situation for the duration.

In Illinois alone, nearly 300 farmers lost their lives in producing and delivering food to market in 1941. Thousands were crippled for life, more thousands were crippled temporarily.

Accidents during wartime are not merely family and community tragedies. Many times they are the result of criminal negligence. Accidents that kill and injure American food-freedom producers add to the enemy.

JETMORE, KAN.—Smuggler Bowie chased a truck to tell the fellow to slow down a bit, but when Bowie came alongside the driver, several and forced the officer's car into the ditch. This made Bowie angry, so he took up the chase again and stopped the truck. Inside were 1,600 bottles of bootleg liquor.

"And all I was going to do was to ask you to slow up," said the officer as he took him to jail.

Sudden changes of temperature in dairy barns or in poultry houses reduce production of eggs and milk. Cows and hens do not work better to replace shortages from the day before.

WPB has assigned top priority rating of A-1 to assure delivery of critical material necessary for manufacture of farm machinery included in the current program.

Soil Management Aid To Increasing Yields

Farmers Co-operating in Test Get Good Results

Luxuriant yields of grain and better stands of hay are becoming increasingly important these days when the demand for cereal, meat and dairy products for war and civilian needs has reached such record peaks.

Whether the output of these crops is large or small on a particular farm depends largely on the condition of the soil that produces them, according to Prof. C. J. Chapman of the college of agriculture, University of Wisconsin.

That such crops respond to soil management is evident from tests carried on in a number of Wisconsin counties in which fertilizers containing phosphorus and potash were applied to small grains and seedlings of clover and alfalfa.

Farmers co-operating in the tests laid out demonstration plots on their land, leaving one area unfertilized. The results in the form of grain yields and hay crops that followed them in the rotation were checked and compared.

The harvests showed that not only was the output of the small grains boosted, but the production of hay that followed in the rotation was greatly increased. The tests showed, too, that the soil improving treatment had a valuable carry-over benefit.

Typical of the results obtained were tests on farms in Portage county.

All Belgian Judges Quit In Dispute With Nazis

LONDON.—The Belgian news agency reported that Belgian magistrates had resigned in a body, closing all the courts of the country, in a dispute with Nazi occupying authorities.

Scores of judges were arrested as hostages, the agency said.

The dispute arose when Belgian judges refused to accept Nazi judicial decrees which they said contravened the Belgian constitution.

American authorities then ordered judges to postpone all decisions for two months. The mass resignations followed.

British Fur Makers Send Coats to Russian Kids

LONDON.—One thousand fur coats have been given to the children of Russia by the British rabbit-skin industry.

On behalf of the Red Cross aid to Russia fund, Mrs. Winston Churchill accepted a token coat at 10 Downing street recently. At the time of the presentation of the coat she expressed the hope that the gifts would reach the children before severe winter weather set in.

The coats are of three sizes, suitable for the children between the ages of 2 and 10 years.
